

COMP9517 Computer Vision

Exam Instructions

Summary

- Time allowed: 5 minutes setup + 10 minutes reading + 2 hours answering.
 - The exam mark will count for 50% toward your final course mark.
 - The exam consists of up to 50 multiple-choice questions each worth 1 mark.
 - All questions may be attempted (no penalty marks for wrong answers).
 - For each multiple-choice question you must select the one best answer.
 - No materials may be taken into or out of the examination room.
 - You will be assigned to a desktop computer to answer exam questions.
 - It is not allowed (and not possible) to consult any works or the internet.
 - A calculator is available from the menu in the exam environment if needed.
 - Scrap paper and a pen will be provided by the exam team and must be returned.
-

Preparation

Attached are 25 representative examples of exam questions. The best way to prepare for the exam is to thoroughly study the course material *before* looking at the questions and then attempt to answer all questions *without* going back to the course materials all the time to find clues.

Please remember that no materials (other than provided by the exam team) may be used during the exam, so the mentioned approach is most realistic. The exam is not to test your ability to search for answers, but to test your actual knowledge and understanding of the concepts taught.

Procedure

The exam will be held in the CSE Labs. The exam procedure is as follows:

Setup (5 minutes): At the beginning of the exam, you will be assigned a desk and computer. The computer runs the Virtual Exam (VX) environment, which is an implementation of an X11-based, limited, secured, firewalled desktop environment for CSE exams. You will need to log into your assigned computer using your UNSW zID and password (do not forget!). Once logged in, the exam paper (a HTML page) will open in the standard VX browser.

Reading (10 minutes): You will be given time to read the exam paper. This is to familiarize yourself with the questions and think about which questions you may want to answer first. At this stage you are not allowed to answer any of the exam questions yet (doing so may get you into trouble).

Answering (2 hours): After the setup and reading time, the instructors will give a signal that you can start answering the questions. Some questions may require basic calculations. You will find a basic calculator in the VX desktop environment.

Your answers are automatically saved every 5 minutes or so and you can also save them manually at any time. So if anything goes wrong with the computer, just ask an instructor for help, and if you

need to be assigned another computer, you should be able to log in there again and continue where you left off. Do not log out until you have finally saved and submitted your answers.
